

## Accessibility

Oak Meadow Primary School is a modern school designed to be accessible by those with disabilities. All access doors are "wheelchair friendly" with ramps where necessary. There is a lift available for accessing the upper floor and emergency call buttons in strategic places. There are toilet facilities for use by those who have disabilities available in every part of the school and worktops and activity areas have been designed with wheelchair access in mind.

Children who have visual impairment have equipment to enable them to work alongside their peers and a number of the staff are trained in sign language to communicate with parents with hearing impairment.
